

Clarity

All the data that matters, in one place

ITAS Bodyshop Software

Discover Clarity

Clarity delivers crucial management information through one easy- to-use system which helps networks to see how their bodyshops are performing in real time.

Reporting

Clarity gives powerful reporting out of the box and integrates with any existing data source to give custom analysis which fits perfectly.

Filtering

Filter by a range of metrics including job cost and type to get a clear overview of specific job performance.

Make	Jobs	Av hours	Av Labour	Av Parts	Av Paint	Av Total repair
	31	18.82	689.10	1016.5	278.41	2176
	31	18.82	689.10	1016.5	278.41	2176
	31	18.82	689.10	1016.5	278.41	2176
	31	18.82	689.10	1016.5	278.41	2176

Example data screen

Balanced KPIs

Bodyshops can compare themselves on a like-for-like basis against other (anonymised) network members by number of ovens or technicians, by work provider, by vehicle manufacturer, by location or by any other factor.

Project the future

Clarity isn't just about reporting on what has happened. It's a powerful data modelling tool, too. If you want to see how profitability might be increased by adding a new oven, or a jig, or a new technician in one bodyshop or many, Clarity will tell you.

Accurate, live, open data

All stakeholders can rely upon our reports to give a truly accurate and up-to-date snapshot of throughput, profitability, parts sales, key-to-key time, product efficiency, paint usage, total loss and more.

Actuals, not estimates

Clarity pulls actual costs through for reporting based upon bodyshop invoices and actual job timings from our Car Tracker system, leveraging completely accurate and dependable information, never estimates.

Standard metrics and filters

- Bays
- Ovens
- Courtesy cars
- Technicians
- Regional
- Jobs
- Job cost
- Job type
- Top Ten makes
- By insurer
- By vehicle age
- Parts cost
- Parts profit
- Paint sales
- Paint costs
- Recovery rate
- Repair time
- Labour rates

Model Parc Report

Year: 2023 | Category: All | Bodyshops: All | Run Report

Model	Part	Total Incidents	Retained Incidents	Incident Penetration	Turn Over
BMW	BMW	507	380	52%	1,120,000,000
BMW	BMW	401	29	7%	1,120,000,000
BMW	BMW	361	49	13%	1,120,000,000
BMW	BMW	379	10	3%	1,120,000,000
BMW	BMW	358	132	36%	1,120,000,000
BMW	BMW	320	0	0%	1,120,000,000

BMW	BMW	212	43	20%	1,120,000,000
BMW	BMW	208	148	72%	1,120,000,000
BMW	BMW	202	130	64%	1,120,000,000
BMW	BMW	184	12	7%	1,120,000,000
BMW	BMW	177	4	2%	1,120,000,000

ITAS. Setting the standard

ITAS provides a bodyshop approval programme, cutting-edge training, ground-breaking software and critical data analysis.

Our Solve body and paint programme creates best-in-class repair networks, bringing commercial value and delivering the best possible post-accident experience.

ITAS Bodyshop Software

Our industry-leading software suite (the 3Cs) comprises Core, Clarity and Capture. It gives an instant 360-degree view of how bodyshops are performing, flexible management reporting and a live overview of every repair in progress.

It is the ideal platform for implementing value-add strategic services such as work deployment, customer satisfaction surveys and repair certificates.

Core

Repairer information, training, audit and standards compliance database.

Clarity

All the data that matters: repair costs and management information reporting.

Capture

Job allocation, progress tracking, integrated vehicle database, Branded customer communication and customer survey generation with full reporting capability.
